ABOUT COMPANY

Company Name: Dot Com Infoway (DCI)

Location: I Floor, Vaigai Colony, Plot No. 3, 80 Feet Rd, opp. to Ambika Theatre, Anna Nagar, Madurai, Tamil Nadu 625020

Overview:

- A premier IT company offering offshore outsourcing solutions globally
- Provides end-to-end IT services: software, web, mobile apps, and digital marketing
- Known for scalable, customized, and cost-effective enterprise solutions

Strengths:

- * Uses Global Delivery Model and strong QA processes
- * Focused on streamlining business operations and boosting productivity
- * Delivers reliable solutions on-time and within budget

WORK DONE

Frontend Development:

- Built a modern, cross-platform **React Native UI** with **TypeScript** and **Expo SDK**.
- Designed a **responsive travel guide interface** with smooth navigation using **Expo Router** and **React Navigation**.
- Implemented **Google Maps integration**, a **carousel for featured destinations**, and dynamic UI components (Lucide Icons, gradients, animations via Moti/Reanimated).
- Focused on **premium UI/UX** with lazy loading and a clean visual hierarchy.

Backend:

- ✓ Used **static JSON data** and local storage (**AsyncStorage**) to simulate backend and booking flows.
- ✓ Incorporated **mock APIs** for destination details and booking validation.
- ✓ No live backend was used — designed as an **offline-first prototype**.

Tools Used:

- ✓ **Visual Studio Code (VS Code)** – coding, linting, and debugging.
- ✓ **Expo Go** – real-time preview and live testing on mobile devices.
- ✓ **ESLint + Prettier** – to maintain code quality and formatting.

Commands Used

To create a new, React Native project:

bash

```
npx create-expo-app travel-guide
```

To run and view the project output with tunnel support:

bash

```
npx expo start --tunnel
```

REFLECTIONS

- ✓ **Developed a real-world cross-platform travel guide app** using React Native, TypeScript, and Expo.
- ✓ **Built modular and reusable components** (cards, carousels, booking forms) for a scalable UI.
- ✓ **Integrated Google Maps API and dynamic navigation flows** with React Navigation & Expo Router.
- ✓ **Designed a clean, performance-first app structure** with optimized state management via Context API and AsyncStorage.
- ✓ **Implemented offline-first features** like caching, persistent favorites, and local data storage.
- ✓ **Strengthened problem-solving & debugging skills** by handling API errors, navigation bugs, and asynchronous flows.
- ✓ **Enhanced UI/UX skills** with smooth animations using Reanimated, Linear Gradient, and Moti.
- ✓ **Practiced agile-style development** — planning, iterating, and refining app modules.
- ✓ **Tested and previewed apps on multiple devices** using Expo Go for cross-platform consistency.
- ✓ **Improved professional coding habits** — version control with Git/GitHub, linting with ESLint, and code formatting with Prettier.
- ✓ **Gained experience in documentation and presentation** (README, architecture diagrams, and feature roadmaps).

OUTPUT

Home Page: Displays a dynamically updating 'Featured Places' carousel.

Explore Page: Offers category-based browsing (Beaches, Food, Temples, etc.) and real-time search with instant results and clear feedback when no matches are found.

Booking Interface: Multi-step form with real-time validation, calendar integration, and confirmation feedback for seamless trip planning.

My Bookings: Displays trip history with details and a call-to-action for new bookings.

CONCLUSION

- ✓ The development of the **Travel Guide App — Tamil Nadu Tourism** was a highly valuable hands-on experience.
- ✓ It allowed me to apply **React Native, TypeScript, and Expo SDK** in building a real-world, cross-platform mobile application.
- ✓ I improved my skills in **UI/UX design, state management (React Context), and integrating Google Maps APIs**, while following modern mobile development workflows.
- ✓ I learned how to **structure a scalable app architecture, optimize performance, and implement persistent storage using AsyncStorage**.
- ✓ This project strengthened my ability to work independently, manage milestones, and deliver a polished solution — preparing me for future roles in **mobile and full-stack development**.

ACKNOWLEDGEMENT

At the outset, I sincerely thank the Almighty for His blessings in helping me successfully complete my internship.

I extend my heartfelt gratitude to our Principal and Secretary, Dr. Beulah Jeyashree R., M.A., M.Phil., Ph.D., for her continuous support and encouragement.

I am deeply thankful to Dr. N. Jayachandra, M.Sc., M.Phil., Ph.D., Head & Associate Professor, Department of Computer Science, for her valuable guidance throughout the internship.

I also thank Dr. T. R. Sivapriya, M.C.A., M.Phil., Ph.D., Coordinator for B.Sc. Information Technology & Associate Professor, Department of Computer Science, for her continued support.

My sincere thanks to the management and team of Dot Com Infoway (DCI) for providing a positive and enriching learning experience.

I express my gratitude to my internship mentor, Dr. Sudhasini P., M.S. (IT), M.B.A., M.Phil., Ph.D., Assistant Professor, Department of Computer Science, for her constructive guidance.

Finally, I thank all the faculty members of the Department of Computer Science, my parents, and friends for their constant motivation and support.

Thanks for listening
